APPENDIX A

§ 128675. Popular name of chapter

This chapter shall be known as the Health Data and Advisory Council Consolidation Act.

(Added by Stats. 1995, c. 415 (S.B. 1360), § 9. Former § 443, added by Stats. 1984, c. 1326, § 7.)

§ 128680. Legislative findings, declarations and intent

The Legislature hereby finds and declares that:

(a) Significant changes have taken place in recent years in the health care marketplace and in the manner of reimbursement to health facilities by government and private third-party payers for the services they provide.

(b) These changes have permitted the state to reevaluate the need for, and the manner of data collection from health facilities by the various state agencies and commissions.

(c) It is the intent of the Legislature that as a result of this reevaluation that the data collection function be consolidated in the single state agency. It is the further intent of the Legislature that the single state agency only collect that data from health facilities that are essential. The data should be collected, to the extent practical on consolidated, multipurpose report forms for use by all state agencies.

(d) It is the further intent of the Legislature to eliminate the California Health Facilities Commission and the State Advisory Health Council, and to create a single advisory commission to assume consolidated data collection and planning functions.

(e) It is the Legislature's further intent that the review of the data that the state collects be an ongoing function. The office, with the advice of the advisory commission, shall annually review this data for need and shall revise, add, or delete items as necessary. The commission and the office shall consult with affected state agencies and the affected industry when adding or eliminating data items. However, the office shall neither add nor delete data items to the Hospital Discharge Abstract Data Record or the quarterly reports without prior authorizing legislation, unless specifically required by federal law or judicial decision.

(f) The Legislature recognizes that the authority for the California Health Facilities Commission is scheduled to expire January 1, 1986. It is the intent of the Legislature, by the enactment of this chapter, to continue the uniform system of accounting and reporting established by the commission and required for use by health facilities. It is also the intent of the Legislature to continue an appropriate, cost-disclosure program.

(Added by Stats. 1995, c. 415 (S.B. 1360), § 9. Former 443.10, added by Stats. 1984, c. 1326, § 7, amended by Stats. 1985, c. 1021, § 15.)

APPENDIX A

§ 128681 Comprehensive review of the financial and utilization reports

The office shall conduct, under contract with a qualified consulting firm, a comprehensive review of the financial and utilization reports that hospitals are required to file with the office and similar reports required by other departments of state government, as appropriate. The contracting consulting firm shall have a strong commitment to public health and health care issues, and shall demonstrate fiscal management and analytical expertise. The purpose of the review is to identify opportunities to eliminate the collection of data that no longer serve any significant purpose, to reduce the redundant reporting of similar data to different departments, and to consolidate reports wherever practical. The contracting consulting firm shall evaluate specific reporting requirements, exceptions to and exemptions from the requirements, and areas of duplication or overlap within the requirements. The contracting consulting firm shall consult with a broad range of data users, including, but not limited to, consumers, payers, purchasers, providers, employers, employees, and the organizations that represent the data users. It is expected that the review will result in greater efficiency in collecting and disseminating needed hospital information to the public and will reduce hospital costs and administrative burdens associated with reporting the information.

July 1995	1990-92	9

Reports for subsequent years shall include conditions and procedures and cover periods as appropriate.

(b) The procedures and conditions to be reported shall be divided equally among medical, surgical and obstetric conditions or procedures and shall be selected by the office, based on the recommendations of the commission and the advice of the technical advisory committee set forth in subdivision (j) of Section 128725. The selections shall be in accordance with all of the following criteria:

- (1) The patient discharge abstract contains sufficient data to undertake a valid risk adjustment.
- (2) The relative importance of the procedure and condition in terms of the cost of cases and the number of cases.
- (3) Ability to measure outcome and the likelihood that care influences outcome.
- (4) Reliability of the diagnostic and procedure data.

(c) The annual reports shall compare the risk-adjusted outcomes experienced by all patients treated for the selected conditions and procedures in each California hospital during the period covered by each report, to the outcomes expected. Outcomes shall be reported in the five following groupings:

- (1) "Much higher than average outcomes," for hospitals with risk-adjusted outcomes much higher than the norm.
- (2) "Higher than average outcomes," for hospitals with risk-adjusted outcomes higher than the norm.

- (4) "Lower than average outcomes," for hospitals with risk-adjusted outcomes lower than the norm.

§ 128750. Preliminary report to hospital included in annual outcome report; explanatory statement; additional information; technical advisory committee duties

(a) Prior to the public release of the annual outcome reports the office shall furnish a preliminary report to each hospital that is included in the report. The office shall allow the hospital and chief of staff 60 days to review the outcome scores and compare the scores to other California hospitals. A hospital or its chief of staff that believes that the risk-adjusted outcomes do not accurately reflect the quality of care provided by the hospital may submit a statement to the office, within the 60 days, explaining why the outcomes do not accurately reflect the quality of care provided by the hospital. The statement shall be included in an appendix to the public report, and a notation that the hospital or its chief of staff has submitted a statement shall be displayed wherever the report presents outcome scores for the hospital.

(b) The office shall, in addition to public reports, provide hospitals and the chiefs of staff of the medical staffs with a report containing additional detailed information derived from data summarized in the public outcome reports as an aid to internal quality assurance.

(c) If, pursuant to the recommendations of the office, based on the advice of the commission, in response to the recommendations of the technical advisory committee made pursuant to subdivision (d) of this section, the Legislature subsequently amends Section 128735 to authorize the collection of additional discharge data elements, then the outcome reports for conditions and procedures for which sufficient data is not available for the current abstract record will be produced following the collection and analysis of the additional data elements.

(d) The recommendations of the technical advisory committee for the addition of data elements to the discharge abstract should take into consideration the technical feasibility of developing reliable risk-adjustment factors for additional procedures and conditions as determined by the technical advisory committee with the advice of the research community, physicians and surgeons, hospitals, and medical records personnel.

(e) The technical advisory committee at a minimum shall identify a limited set of core clinical data elements to be collected for all of the added procedures and conditions and unique clinical variables necessary for risk adjustment of specific conditions and procedures selected for the outcomes report program. In addition, the committee should give careful consideration to the costs associated with the additional data collection and the value of the specific information to be collected.

(f) The technical advisory committee shall also engage in a continuing process of data development and refinement applicable to both current and prospective outcome studies.

(c) Modifications to discharge data reporting requirements. When these health facilities are operated as units of a coordinated group of health facilities under common management, they shall be authorized to report as a group rather than as individual institutions. As a group, they shall submit a consolidated income and expense statement.

If such a determination is made, the Office shall begin the following process:

(1) The Office shall notify the licensee at the mailing address of the health facility of the determination of noncompliance and the licensee shall have 90 days in which to file the following in writing with the Office:

(A) A copy of the health facility's current Chart of Accounts with account codes and titles certified by an official of the facility that it is the Chart of Accounts that is used on a day-to-day basis by the health facility and

The notification will include the licensee's right to appeal the penalty pursuant to Section 97052.

(b) After a health facility has been determined to be non-compliant and has failed to develop an approved plan of action to implement the prescribed system of accounting, the health facility shall be liable for a penalty of five thousand dollars (\$5,000) each time the health facility files a report pursuant to either Section 128735(a) through (e) or Section 128740 of the Health and Safety Code. - (a) To obtain modifications to the uniform accounting and reporting systems specified by Sections

Office of Statewide Health Planning and Development
ACCOUNTING AND REPORTING MANUAL FOR CALIFORNIA HOSPITALS

APPENDIX A

97017, 97018, and 97019, including modifications to the account coding structure,

health facilities must file a written request for modification with the Office. Health facilities must have an Office-approved modification prior to implementation of any change to the applicable uniform accounting system. Modification requests shall specify the precise changes being requested and the reason(s) the changes are needed. Requests from health facilities for modification to the applicable uniform accounting system, including requests to use an alternate coding scheme, shall be accompanied by (1) a cross reference between the facility's proposed account codes and titles, and the account codes and titles in the applicable accounting and reporting manual and (2) the facility's account definitions. The Office shall either approve or disapprove requests for modification within 60 days of the date the request was filed with the Office by the health facility, or the request shall be considered approved as submitted. However, if additional information is required from the health facility to evaluate the request, the Office shall have 30 days from the receipt of the additional information to approve or disapprove the request. The Office may also seek additional information from other appropriate sources to evaluate the request. Approved requests for systems modifications are subject to annual review and renewal by the Office.

(b) The Office shall grant modifications, upon written application, to licensed health facilities that are an integral part of a residential care complex to permit accounting and reporting for assets, liabilities, and equity for the entire residential care complex rather than require separate accounting for health care related assets, liabilities, and equity. Requests for modifications under this paragraph shall be submitted prior to the start of the accounting period to which the modifications are to apply and shall specify the proposed balance sheet account related modifications.

(c) The Office may grant modifications, upon written request, to licensees operating and maintaining more than one physical plant on separate premises under a single consolidated hospital license, issued pursuant to Health and Safety Code Section 1250.8, to file separate annual disclosure reports and quarterly financial and utilization reports for each location. The Office may also grant modifications, upon written request, to licensees of hospitals to file annual disclosure reports and quarterly financial and utilization reports for their mental health or rehabilitation care operations separately from the rest of the hospital operations. Licensees granted modifications under this paragraph shall be responsible for all regulatory requirements for each separate report. Separate extension requests, filed under the provisions of Section 97051, shall be required for each report, and penalties, assessed pursuant to Section 97045, shall be assessed on each delinquent report.

(d) In determining what modifications will be granted to health facilities under (a) or (c), the Office may take into account, but not be limited to the following factors:

(1) The data reported are comparable to data reported from other health facilities to the maximum extent feasible as determined by the Office;

(2) The report substantially complies with the purposes of the Health Data and Advisory Council Consolidation Act;

(3) The facility has considered and has a plan for the eventual or gradual implementation of the general accounting and reporting systems prescribed by the Office; and

(4) The burden on the health facility to report otherwise required data is sufficiently great that the cost to the health facility of preparing these data would outweigh the benefit to the people of the State of California.

Reference: Section 128760, Health and Safety Code.

97051. Requests for Extension Time to File Required Reports.

Any licensee of a health facility may file with the Office requests for reasonable extensions of time to file any or all of the reports required pursuant to subdivisions (a) through (e) of Section 128735, Section 128740, or Section 128755, Health and Safety Code. Licensees of health facilities are encouraged to file extension requests as soon as it is apparent that the required reports will not be completed for submission on or before their due date. The requests for extension shall be supported by justification which may provide good and sufficient cause for the approval of the extension requests. To provide the Office a basis to judge good and sufficient cause, the letter of justification shall include a factual statement indicating (1) the actions taken by the health facility to produce the disclosure reports by the required deadline, (2) those factors which prevent completion of the reports by the deadline, and (3) those actions and the time (days) needed to accommodate those factors.

The Office shall respond within 10 calendar days of receipt of the request by either granting what the Office determines to be a reasonable extension or disapproving the request. If disapproved, the Office shall set forth the basis for a denial in a notice sent by certified mail to the health facility. The Office may seek additional information from the requesting health facility. The Office may grant extensions but not to exceed an accumulated total, for all extensions and corrections, of 90 days for annual reports required by Section 97040 and 30 days for quarterly reports required by Health and Safety Code Section 128740. A health facility which wishes to contest any decision of the Office shall have the right to appeal in accordance with the provisions of Section 97052.

The civil penalty of one hundred dollars (\$100) a day, provided for in Section 97045, shall commence the day after the report due date notwithstanding the filing of a petition to review the Office's denial of a request for an extension of time in which to file required reports or the filing of a request for an extension of time in which to file required reports.

Authority: Section 128810, Health and Safety Code.

Reference: Section 128755 and 128770, Health and Safety Code.

97052. Appeal Procedure.

(a) Any health facility affected by any determination made under the Act by the Office may appeal the decision. 97226. Definition of Data Element—Other Diagnoses and Whether the Conditions were Present at Admission.

(a) The patient's other diagnoses are defined as all conditions that coexist at the time of admission, that develop subsequently during the hospital stay, or that affect the treatment received and/or the length of stay. Diagnoses that relate to an earlier episode that have no bearing on the current hospital stay are to be excluded. Diagnoses shall be coded according to the ICD-9-CM. ICD-9-CM codes from the supplementary classification of external causes of injury and poisoning (E800-E999) shall not be reported as other diagnoses.

(b) Effective with discharges on or after January 1, 1996, whether the patient's other diagnoses were present at admission shall be reported as one of the following:

- (1) Yes.
- (2) No.
- (3) Uncertain.

97227. Definition of Data Element—External Cause of Injury.

The external cause of injury consists of the ICD-9-CM codes E800-E999 (E-codes), that are codes used to describe the external causes of injuries, poisonings, and adverse effects. If the information is available in the medical record, E-codes sufficient to describe the external causes shall be reported for discharges with a principal and/or other diagnoses classified as injuries or poisonings in Chapter 17 of the ICD-9-CM (800-999), or where a code from Chapters 1-16 of the ICD-9-CM (001-799) indicates that an additional E-code is applicable, except that the reporting of E-codes in the range E870-E879 (misadventures and abnormal reactions) are not required to be reported. An E-code is to

be reported only for the first inpatient hospitalization during which the injury, poisoning, and/or adverse effect was diagnosed and/or treated. To assure uniform reporting of E-codes, when multiple codes are required to completely classify the cause, the first (principal) E-code shall describe the mechanism that resulted in the most severe injury, poisoning, or adverse effect. If the principal E-code does not include a description of the place of occurrence of the most severe injury or poisoning, an E-code shall be reported to designate the place of occurrence, if available in the medical record. Additional E-codes shall be reported, if necessary to completely describe the mechanisms that contributed to, or the causal events surrounding, any injury, poisoning, or adverse effect first diagnosed and/or treated during the current inpatient hospitalization.

APPENDIX A

97228. Definition of Data Element—Principal Procedure and Date.

The patient's principal procedure is defined as one that was performed for definitive treatment rather than one performed for diagnostic or exploratory purposes, or was necessary to take care of a complication. If there appear to be two procedures that are principal, then the one most related to the principal diagnosis should be selected as the principal procedure. Procedures shall be coded according to the ICD-9-CM. If only non-therapeutic procedures were performed, then a non-therapeutic procedure should be reported as the principal procedure, if it was a significant procedure. A significant procedure is one that is surgical in nature, or carries a procedural risk, or carries an anesthetic risk, or is needed for DRG assignment. The date the principal procedure was performed shall be reported in numeric form as follows: the 2-digit month, the 2-digit day, and the 4-digit year. The numeric form for days and months from 1 to 9 must have a zero as the first digit.

Authority: Section 128810, Health and Safety Code.

Reference: Section 128735, Health and Safety Code.

97229. Definition of Data Element—Other Procedures and Dates.

All significant procedures are to be reported. A significant procedure is one that is surgical in nature, or carries a procedural risk, or carries an anesthetic risk, or is needed for DRG assignment. Procedures shall be coded according to the ICD-9-CM. The dates shall be recorded with the corresponding other procedures and be reported in numeric form as follows: the 2-digit month, the 2-digit day, and the 4-digit year. The numeric form for days and months from 1 to 9 must have a zero as the first digit.

Authority: Section 128810, Health and Safety Code.

Reference: Section 128735, Health and Safety Code.

97230. Definition of Data Element—Total Charges.

The total charges are defined as all charges for services rendered during the length of stay for patient care at the facility, based on the hospital's full established rates. Charges shall include, but not be limited to, daily hospital services, ancillary services, and any patient care services. Hospital-based physician fees shall be excluded. Prepayment (e.g., deposits and prepaid admissions) shall not be deducted from Total Charges. If a patient's length of stay is more than 1 year (365 days), report Total Charges for the last year (365 days) of stay only.

97240. Request for Modifications to the California Hospital Discharge Data Set.

(a) Hospitals may file a request with the Office for modifications to the California Hospital Discharge Data Set. The modification request must be supported by a detailed justification of the hardship that full reporting of discharge data would have on the hospital; an explanation of attempts to meet discharge data reporting requirements; and a description of any other factors that might justify a modification. Modifications may be approved for only one year. Each hospital with an approved modification must request a renewal of that approval 60 days prior to termination of the approval period in order to have the modification continue in force.

(b) The criteria to be considered and weighed by the Office in determining whether a modification to discharge data reporting requirements may be granted are as follows:

(1) The modification would not impair the ability of either providers or consumers to make informed health care decisions.

(2) The modification would not deprive the public of discharge data needed to make comparative choices with respect to scope or type of services or to how services are provided, and with respect to the manner of payment.

(3) The modification would not impair any of the goals of the Act.

Authority: Section 128810, Health and Safety Code.

Reference: Sections 128735 and 128760, Health and Safety Code.

97241. Requests for Extension of Time to File Discharge Data.

Extensions are available to hospitals that are unable to complete their submission of discharge data reports by the due date prescribed in Section 97211. A maximum of 60 days is allowed for all extensions, corrections, and resubmittals. Hospitals are encouraged to file extension requests as soon as it is apparent that the required data will not be completed for submission on or before their due date. The request for extension shall be postmarked on or before the required due date of the discharge data report and supported by a letter of justification that may provide good and sufficient cause for the approval of the extension request. To provide the Office a basis to determine good and sufficient cause, the letter of justification shall include a factual statement indicating:

(1) the actions taken by the hospital to produce the discharge data report by the required deadline;

(2) those factors that prevent completion of the discharge data report by the deadline; and

- (3) those actions and the time (days) needed to accommodate those factors.

The Office shall respond within 10 days of receipt of the request by either granting what is determined to be a reasonable extension or disapproving the request. If disapproved, the Office shall set forth the basis for a denial in a notice to the hospital sent by certified mail. The Office may seek additional information from the requesting hospital. The Office shall not grant extensions that exceed an accumulated total of 60 days for all extensions and corrections of discharge data. If a hospital submits the discharge data report prior to the due date of an extension, those days not used will be applied to the number of remaining extension days. A hospital that wishes to contest any decision of the Office shall have the right to appeal, pursuant to Section 97052.

Authority: Section 128810, Health and Safety Code.

Reference: Section 128735, Health and Safety Code.

97242. Error Tolerance Levels.

(a) The error tolerance levels for discharge data items reported to the Office shall be as shown in Table 1. An error percentage that exceeds a specified error tolerance level shall be corrected by the hospital to the specified tolerance level.

(b) For error percentages for the data elements Admission Date and Discharge Date that do not exceed the error tolerance levels specified in Table 1, the Office shall delete each record with an error in one of these data elements from the hospital's report if the hospital fails to correct the data after a 30 calendar day notification by the Office of the errors.

(c) Effective with discharges occurring on or after July 1, 1990, for error percentages for data elements other than Admission Date and Discharge Date that do not exceed the error tolerance levels specified in Table 1, the Office shall assign default values of blank, which may be represented by a zero, except that for the data element Whether the Condition was Present at Admission for the Principal Diagnosis the Office shall assign the default value of Yes, if the hospital fails to correct the data after a 30 calendar day notification by the Office of the errors.
